

# Command Line Interface Made Easy (CLIME)

Mario Ramirez Joseph Krause Benny Perchez

Mentors  
Prof. Damien Doheny  
Dr. Renu Balyan

## Abstract

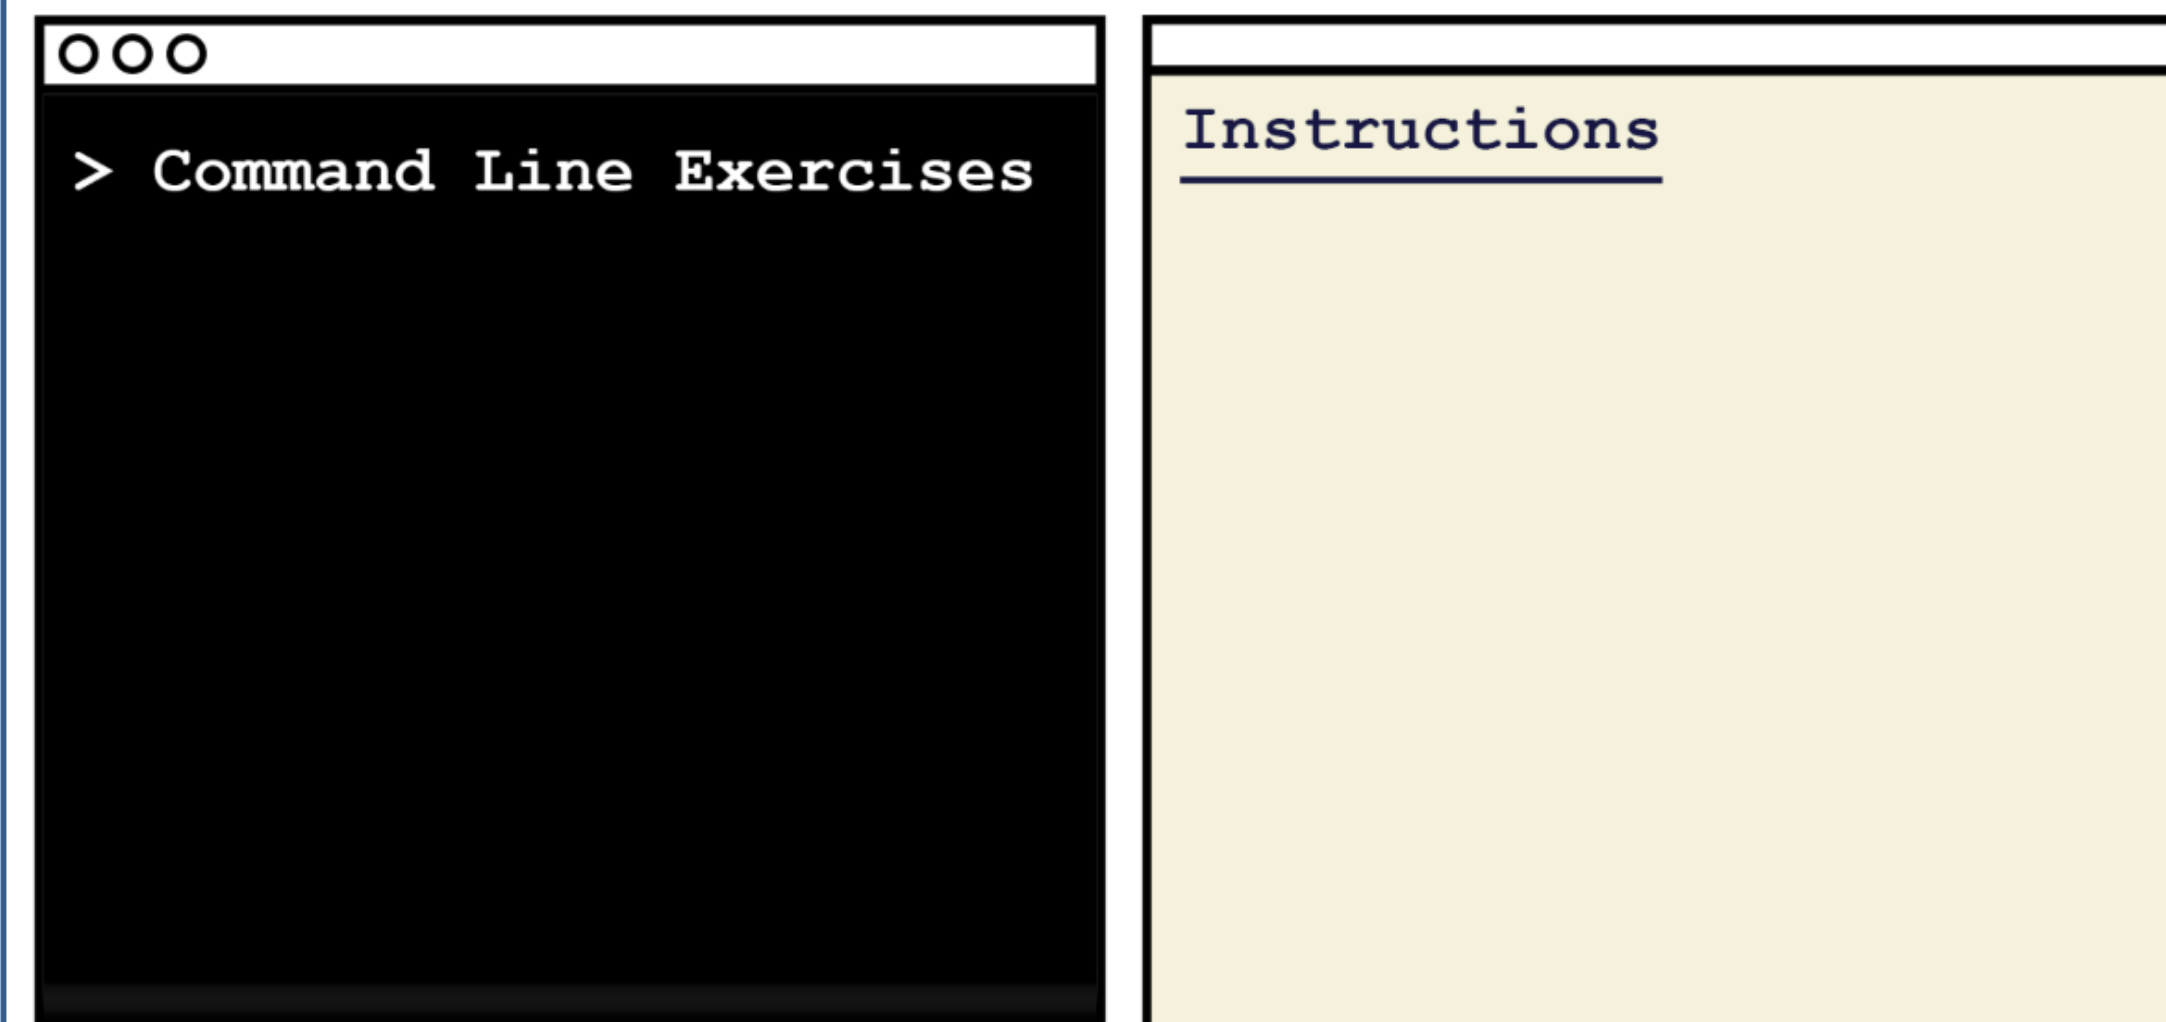

CLIME is a computer program that aims to increase the CLI interpretation skills of high school students to prepare them for future roles in IT and Software Development.

## Project Description

**What:** A computer program

**Why:** To introduce students to the Command Line

**Who:** High School Students, Computer Novices

## Features

- Real-world CLI use-cases and examples
- Learn Windows and Linux commands
- Lightweight application can run on most hardware
- Windows, Mac, and Linux Compatible

## Lessons Learned

- How to properly outline requirements to keep project development on track
- Task delegation based on skillset
- Github is crucial to group project development

## Future Plans

- Add more commands per
- Add voice feedback
- Add grade reporting for teachers

## Technologies Used

GitHub

Sublime

Python

JSON

## Agile Development

- Weekly sprints based on user stories
- Remote Collaboration
